**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 9 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 9 recites that the land has an upper surface with a linear part on it top. However, independent claim 6 recites that the land is "entirely curved upwardly". The recitation of a linear land surface appears to contradict the recitation for an entirely curved land.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Art Unit: 1791

Claims 6, 8, and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Jermo (US 5,543,015). Jermo discloses an extended nip press belt having grooves 14 and lands 16, wherein the lands have upwardly curved surfaces 24 and tapered sidewalls 22 to the top. See Figures 2 and 4. A shoe press roll is shown in Figure 5.

Claims 6-8 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Ishii (US 6,296,738). Ishii discloses a shoe press belt having grooves 14 and tapered lands 18, wherein the tapered lands have upwardly curved surfaces 16 and 24 to the top. See Figure 6. The curved surfaces 16 in this figure appear to be parabolic.

Claims 6, 7, and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Matuschczyk (US 6,416,630). Matuschczyk discloses a shoe press belt having grooves 14 and lands comprising side walls 18 and rounded sections 20' from the side walls to the top. See Figures 1 and 2, and column 5, lines 39-50, 59-62.

Claims 6-10 are rejected under 35 U.S.C. 102(e) as being anticipated by Romanski (US 7,374,640). Romanski discloses a grooved elastic press belt. The belt is suitable for a shoe press (column 1, lines 65-66). Figures 2 and 3B show grooves 22 and lands 20, wherein the lands have an entirely rounded, curved surface which taper to the top. The shape of the land is deemed to meet the claimed  $s/W < 0.10$ , wherein the width  $s$  = zero or approximately zero.
